CAREER OBJECTIVE

Passionate and forward-thinking Junior Software Engineer aspiring to secure a challenging role that allows me to leverage my robust technical expertise. Seeking an environment where I can immerse myself in learning from seasoned professionals, while actively contributing to the success of cutting-edge projects. Eager to work in a dynamic and collaborative workplace that not only recognizes but encourages innovative thinking, fostering both personal and professional growth.

WORK EXPERIENCE

Trainee Software Engineer

Mindpool Technologies Ltd, Pune

[January 4, 2023.] - Present

Project: Structured Digital Database

Development Stack:

- Backend Framework: Laravel
- Frontend Libraries/Frameworks: jQuery, Vue, Bootstrap, Tailwind CSS
- Database: MySQL

Key Features and Implementation:

- Employed the MVC (Model-View-Controller) architecture in Laravel for a modular and organized codebase, enhancing maintainability and scalability.
- Utilized Laravel's built-in authentication system for secure user management.
- Developed Laravel Eloquent models to interact with the database, ensuring efficient data retrieval.
- Utilized Bootstrap for designing a clean and user-friendly interface for entering and managing company details.
- Collaborated closely with Compliance Officers to ensure the system adheres to regulatory standards.
- Integrated Blade templating for seamless template reuse, ensuring clean and maintainable UI components.

Role and Responsibilities:

- Write clean, maintainable, and efficient code using industry best practices.
- Collaborate with team members to design and implement software solutions.
- Stay updated on emerging technologies and incorporate them into ongoing projects
- Work closely with cross-functional teams, including UX/UI designers, QA engineers, and project managers, to deliver high-quality solutions.
- Troubleshoot and debug software issues, addressing bugs and performance bottlenecks.
- Develop and execute comprehensive test plans to ensure the reliability and security of software applications.
- Create and maintain technical documentation for code, APIs, and system architecture.
- Ensure that documentation is up-to-date and accessible to team members.
- Engage in self-learning to enhance skills and contribute to the team's collective knowledge.
- Contribute to the success of projects by meeting deadlines and delivering high-quality code.
